STOCK and SON'S SOIL-PAN SERVICE-BOX.

The object of this contrivance is to facilitate the introduction of sanitary improvements into the dwellings of the working classes, by the adoption of such an arrangement of closet soil-pan apparatus as will enable the consumer supply [illegible] of water service to be made available for the removal of the refuse, by preventing the [illegible] waste of water in places of this description, to which water companies now so generally and so properly object. By the use of this service-box an ample supply of water is obtained, without the possibility of its being wasted by propping the valve, weighting the handle, or by other means. It is so constructed that, as long as the discharge valve remains open, a further supply cannot enter the pan from the main.—Drawings and descriptions may be obtained from STOCK and SON, manufacturers of plumbers' brass-work, gas-fittings, and church furniture, in iron and brass, Temple-street, Birmingham.
